Southern Great Plains Cohort
Remote Group Technical Assistance
May 7, 2020; 11-1pm CDT
Today’s Agenda

11:00am – 1:00pm CDT

• Introductions

• Regional resources

• Facilitated discussion to share regional knowledge, experiences, ideas and needs

• Demonstration of TCHA tools

• Technical assistance/Q&A
Introductions

Purpose

- Technical assistance remote workshops are designed for and focused exclusively on the unique climate and health exposures, impacts and strategies of selected regional cohorts
- Supplements the national training by leveraging and sharing region-specific knowledge, data, partnerships, and other opportunities and resources
- Supports regional and multidisciplinary relationship building and collaboration

Please introduce yourself

- Name
- Organization
- Location
- Your role in climate change
Introduction to Southern Great Plains Climate Exposures and Impacts

• Rising temperatures are leading to increased demand for water and energy. In parts of the region, this will constrain development, stress natural resources, and increase competition for water. New agricultural practices will be needed to cope with changing conditions.

• Less precipitation and greater evaporation will accelerate depletion of water resources (e.g. High Plains Aquifer)

• Extreme events include storms, hurricanes, and wildfire

• Communities that are already the most vulnerable to weather and climate extremes will be stressed even further by more frequent extreme events occurring within an already highly variable climate system.

• Alter the habitats of vectors (mosquitoes, ticks, rodents, and fleas)

• Sea level rise in coastal areas (e.g. Louisiana)

Group Discussion:
What health impacts is your community is facing?
Introduction to Southern Great Plains Climate Exposures and Impacts

Exposures will increase public health risks:

- Heat related illness/premature death
- Vector-borne disease (e.g. hantavirus, West Nile virus, Rocky Mountain spotted fever, dengue, Zika)
- Physical injury or population displacement from extreme events
- Disruptions to water supply availability
- Disease due to drinking water and fish contamination
- Disruptions to food supply disruption
- Mental stress from drought
- Threats to tribal cultural traditions and practices (e.g. declining native species)
Regional Resources

A few places to find more information about So. Great Plains exposures and impacts

Regional Resources

South Central Climate Adaptation Science Center
https://southcentralclimate.org/tribal-nations-climate/

• Provides decision makers with the science, tools, and information they need to address the impacts of climate variability and change on their areas of responsibility

• Native Nations Climate Adaptation & Vulnerability Assessment Resources
https://southcentralclimate.org/tribal-nations-climate/native-nations-climate-adaptation-resources/
Regional Resources

April Taylor
April Taylor, GISP
Sustainability Scientist
Chickasaw Nation, Choctaw Nation of Oklahoma, South Central Climate Adaptation Science Center
Phone: 1-580-235-7430
Email: April.Taylor@chickasaw.net

Regional Resources

Southern Climate Impacts Planning Program (SCIPP)
Norman, OK
http://www.southernclimate.org/

The mission of SCIPP, a NOAA RISA Team, is to increase the awareness of and preparedness for southern U.S. climate hazards for both present day and future climate conditions through improved local hazard mitigation planning; actively engage stakeholder groups to promote increased two-way knowledge transfer between climate scientists and decision makers; provide local, state, and regional decision makers with climate hazard data that is comprehensive, accurate, and easily accessible; and identify new, critical areas of applied climate research for the southern U.S. as technologies, research, and knowledge evolves.
Regional Resources

Southern Plains Climate Hub

https://www.climatehubs.usda.gov/hubs/southern-plains
Regional Resources

Southern Regional Climate Center
Baton Rouge, LA
https://www.srcc.lsu.edu/

• The center's mission is to increase the use and availability of climate data, tools, & information in the Southern U.S. to help private and public sector constituents reduce risk & improve resilience to the impacts of climate variability & change.
Regional Resources

Texas Sea Grant
College Station, TX
https://texasseagrant.org/

• Improves the understanding, wise use, and stewardship of Texas coastal and marine resources.
• Develops and supports research, education and outreach programs and partnerships.
• Unites the resources of the federal government, the state, and universities across the state to create knowledge, tools, products and services that benefit the economy, the environment, and the citizens of Texas.
Regional Resources

Tribal Epidemiology Centers

Oklahoma Area
http://tribalepicenters.org/oklahoma-area-tribal-epidemiology-center/
- To improve the health of American Indian/Alaska Natives in Kansas, Oklahoma and Texas, by providing public health services in epidemiology, data management, data analysis, training, health promotion/disease prevention, and research through outreach and creative partnerships.
Regional Resources

• State specific resources: Oklahoma

State Climatologist
Oklahoma-Gary McManus
Norman, OK
http://climate.ok.gov/

• Acquires, processes, and disseminates climate and weather data and information for use by Oklahoma citizens. Provides climate services and conducts research on the impacts of climate on human activities.
Regional Resources

• State specific resources: Texas

EPA Factsheet: Texas Climate and Health Resources

Texas-Dr. John Nielsen-Gammon
College Station, TX
https://climatexas.tamu.edu/

• Provides the state of Texas with accurate climate information and expertise in the field of climatology. Also promotes education and understanding of the climate, its elements, and its impacts on Texas.

Texas Sea Grant
College Station, TX
https://texasseagrant
Facilitated Discussion

Facilitated discussion to share regional knowledge, experiences, ideas and needs

- What has your organization to prepare for the health or other impacts of climate change?
- What health impacts are you most concerned about?
- What resources have been particularly useful?
- What were some of your biggest challenges?
- What adaptation strategies are working?
- How have you partnered with other tribes or agencies in the region?
Demonstration of TCHP Tools

www.tribalclimateahealth.org

Adaptation Planning Tool – Exposures, Impacts, and Strategies Inventory (EISI) tool (Updated October 2, 2019 BETA VERSION). This is a draft of a customizable companion tool that can support communities that are conducting adaptation planning. Information and data sources are compiled and organized to present information needed at several decision-making steps to help your community prepare to take the most effective actions. We are continuing to build functionality and improve information. The latest update includes more indicators and data sources (national and California specific). Please send questions or comments to ahacker@prospersustainably.com.

Survey Template – Climate Vulnerability Experiences and Priorities Survey for gathering initial community input. If you have a Google account, you can use this link to create and save a copy of this template to customize for your tribe.

Sample Reports – Pala Band of Mission Indians Climate Change Vulnerability Assessment and Climate Change Adaptation Plan. These reports incorporate health impacts and strategies. This Word version allows others to modify for their own community.

Fact Sheets – Pala Band of Mission Indian produced the following fact sheets to help their community understand high-risk climate exposures and how to recognize and prepare for climate threats:

- Extreme Heat (Elevated Temperatures)
- Wildfires
- Flooding and Storms
- Drought
